

Availability Intelligence

Smart and Enthusiastic?

Join us as a full-stack .NET developer

Are you a bright and enthusiastic scientifically educated software developer who would like to work for an informal software company with a great atmosphere?

Our company, **IntelliMagic** in **Leiden**, develops technically interesting software that manages IT-infrastructure performance. We sell our software to large companies in Europe and the USA. The application domain ensures intellectually and technically interesting challenges.

To expand one of our development teams we are looking for a smart **software engineer** with deep experience in the development of web applications using **ASP.NET MVC**.

Tasks

- The design and implementation of new functionality in our web user interface, including front-end and back-end.
- Maintaining code, fixing bugs and implementing structural improvements.
- Developing automatic unit tests and integration tests.
- Third line support, such as the deep analysis of user issues.

You will work closely together with the other developers and the testers that work on the same product, as well as with our internal support people. Our development process is based on agile principles, with monthly release cycles.

About us

IntelliMagic is a privately-owned Dutch company with 66 employees that is led by the two owners. We develop the software in our headquarter offices based in a historical building in the city center of Leiden, and we have two sales offices in the USA and Germany. Our customers are large companies all over the world.

Who you are

- You hold a Master's degree in Science or Technology.
- You have extensive experience designing and developing dynamic web interfaces using C#, ASP.NET MVC, HTML(5), CSS, JavaScript, jQuery, Bootstrap, SignalR.
- You can understand and expand complex source code and suggest ideas for improvement.
- You like to keep up with new developments and apply them in your work.
- You place a high value on the quality of your work and deliver robust and maintainable code.
- You are a conceptual thinker who creates solid technical designs and sound solutions.
- You are customer-focused in design and development and strive to optimize the user experience.
- You are friendly and communicative with your colleagues and external contacts.
- You are fluent in English and are eager to improve your Dutch through an intensive course, so that you can become fluent in Dutch as well.

What do we offer

We offer an informal work place in a beautiful office in the city center of Leiden, where you will work in a team of highly educated, competent people. Enjoying your job is important to us. We strive to provide you with tasks and responsibilities that match your qualities. We offer great employment conditions.
